

Sustainable Procurement Working Group

Local Government Victoria invites you to participate in the Sustainable Procurement Working Group.

The purpose of the group is to guide and inform how local governments in Victoria can better achieve positive social, environmental and local economic outcomes through procurement, as it relates to the roll-out of the Procurement Excellence Program.

Participation in the group could include:

- Contributing to development of a 'thought leadership' around triple bottom line procurement
- Reviewing current practice to identify gaps and barriers to embedding sustainability in procurement activities
- Identifying, developing and/or reviewing best practice templates and tools to populate the [Local Government Procurement eHub](#)
- Strengthening relationships between sustainability practitioners and programs to leverage long-lasting outcomes that benefit the sector.

For more information, please contact Amelia Chapman.
